

TRI-PARTY AGREEMENT

Change Notice Number TPA-CN- 0730	TPA CHANGE NOTICE FORM	Date: July 14, 2016
Document Number, Title, and Revision: DOE/RL-2000-59, <i>Sampling and Analysis Plan for Aquifer Sampling Tubes</i> , Rev. 1		Date Document Last Issued: February 2009
Approved Change Notices Against this Document: TPA-CN-327, TPA-CN-353, TPA-CN-556, TPA-CN-612, TPA-CN-676		
Originator: J. Virgin		Phone: 373-3053
Description of Change: Insertion of a preamble to DOE/RL-2000-59, <i>Sampling and Analysis Plan for Aquifer Sampling Tubes</i> , Rev. 1, U.S. Department of Energy. This insertion is to clarify that requirements and remaining activities specific to the 100-HR-3 groundwater operable unit are now replaced by the requirements and activities in DOE/RL-2013-30, <i>Sampling and Analysis Plan for 100-HR-3 Groundwater Operable Unit Monitoring</i> , Rev. 0. The preamble will also clarify that requirements and activities for the 100-BC-5, 100-FR-3, 100-KR-4, 100-NR-3, 200-PO-1, and 300-FF-5 groundwater operable units will remain in effect.		
<p>M.W. Cline and N.M. Menard/R.A. Lobos agree that the proposed change DOE Lead Regulatory Agency</p> <p>modifies an approved workplan/document and will be processed in accordance with the Tri-Party Agreement Action Plan, Section 9.0, <i>Documentation and Records</i>, and not Chapter 12.0, <i>Changes to the Agreement</i>.</p> <p>A new preamble is added prior to the existing Cover and Executive Summary. A new page P-1 is being added prior to the existing Page 1 of the document.</p> <p>Note: Because the entire text of the preamble is new, no <u>underlining</u> is used.</p> <p>Note: Include affected page number(s): New page number P-1</p>		
Justification and Impacts of Change: DOE/RL-2013-30, <i>Sampling and Analysis Plan for 100-HR-3 Groundwater Operable Unit Monitoring</i> , Rev. 0, was published in June, 2016. DOE/RL-2013-30 incorporates all requirements and remaining activities from DOE/RL-2000-59, Rev. 1 for the 100-HR-3 groundwater operable unit. Beginning August 1, 2016, DOE/RL-2000-59 no longer applies to the 100-HR-3 groundwater operable unit. Requirements and activities remain in effect for the 100-BC-5, 100-FR-3, 100-KR-4, 100-NR-3, 200-PO-1, and 300-FF-5 groundwater operable units. <p>DOE/RL-2000-59 was developed to implement the plan and schedule to implement sampling and analysis for the interim remedial actions selected to meet the requirements of the interim action ROD (EPA/ROD/R10-96/134) and interim action ROD amendment (EPA/AMD/R10-00/122). DOE/RL-2013-30 has been developed to provide a single controlling document that includes the plan and schedule to implement sampling and analysis for the interim remedial actions selected to meet the requirements of the interim action ROD (EPA/ROD/R10-96/134) and interim action ROD amendment (EPA/AMD/R10-00/122) for cleanup of groundwater in the 100-HR-3 OU.</p>

 EPA Project Manager	7/28/2016 Date	<input checked="" type="checkbox"/> Approved <input type="checkbox"/> Disapproved
 Ecology Project Manager	7/28/2016 Date	<input checked="" type="checkbox"/> Approved <input type="checkbox"/> Disapproved

Sampling and Analysis Plan for Aquifer Sampling Tubes

DOE/RL-2000-59, Rev. 1

PREAMBLE

This sampling and analysis plan was prepared to identify requirements for collection and analysis of groundwater samples from aquifer tubes along the Hanford Site shoreline of the Columbia River. The results are intended to provide information on concentrations of contaminants in groundwater discharges to the Columbia River.

Department of Energy (DOE) Richland Operations office (RL) and Washington State Department of Ecology (Ecology) have developed an updated monitoring plan, DOE/RL-2013-30, *Sampling and Analysis Plan for 100-HR-3 Groundwater Operable Unit Monitoring*, Rev. 0, which integrates aquifer tube sampling and analysis with upland groundwater monitoring. The updated monitoring plan (DOE/RL-2013-30) meets requirements from the interim action ROD and interim action ROD amendment (EPA/AMD/R10-00/122) for implementing the interim actions in the 100-HR-3 OU.

For the 100-HR-3 OU only, this change notice retires the requirements and remaining activities in DOE/RL-2000-59, Rev. 1, and replaces them with the requirements and remaining activities in DOE/RL-2013-30, Rev. 0, beginning August 1, 2016. The requirements and remaining activities in DOE/RL-2000-59, Rev. 1, remain in effect for the 100-BC-5, 100-FR-3, 100-KR-4, 100-NR-3, 200-PO-1, and 300-FF-5 groundwater operable units.
